

# MIXER 70

**Mixer sequential** | reference : 3B03601000

Practical and compact mortar mixer.

A twin spiral blade on a horizontal shaft allows for fast and homogeneous mixing.

Mixer fitted with a speed regulator and automatic forward/backward running function, with electronic water dosing.

## TECHNICAL DATA

|                                      |                      |
|--------------------------------------|----------------------|
| Capacidad de tolva                   | 70 L                 |
| Alimentación eléctrica               | 230 V / 50 - 60 Hz   |
| Corriente motor                      | 5.4 A                |
| Potencia del motor                   | 1.1 kW               |
| Velocidad de rotación adelante/atrás | de 28 a 80 giros/min |
| Hélice helicoidal                    | 1                    |
| Altura de carga                      | 135 cm               |
| Dimensiones (l x a x alt.)           | 88 x 52 x 57 cm      |
| Peso total                           | 75 kg                |

(\*) depending on the characteristics of the product used, the stator, the rotor, the diameter and length of the hose, the spraying height and the ambient temperature.
